<

GUNDO BLESSING NTOKO

FULL-STACK WEB DEVELOPER

/ ALL ABOUT ME

I am a self-taught web developer with the ability to move freely between the front-end and back-end. Being able to apply myself in both departments is a challenge I relish and wish to expand upon. I want to see exactly what I can do and become in code, design, and all things digital.

/>

/ WORK EXPERIENCE

>> Freelance Web Developer

Self-Employed | January 2021 to present

Development of static websites and deployment to Azure cloud services for hosting. Use of MongoDB for the creation of dynamic databases to handle data in innovative ways. Designing and wireframing of websites using Figma and Photoshop. Creative projects using ThreeJS to explore 3D design and game development for the web.

>> Junior Web Developer

Saber Industries(Non-Disclosure) | July 2019 to June 2020

I cannot disclose a lot of details due to signing a non-disclosure agreement, but my abilities and skills include creating a video streaming service using Socket.io and WebRTC, creating a chat application using Socket.io and MongoDB, creating graphs and charts using D3.js to visually represent data, connecting front-ends to back-ends for dynamic communication with databases, use of encryption to secure communication between front-end and back-end

/ EDUCATION HISTORY

>> Umuzi Academy

National Certificate in Information Technology (System Development) (SAQA ID 48872)| November 2021 - Present

>> University of Johannesburg

Diploma in Management Services | Obtained in 2018

>> Afrikaanse Hoerskool Germiston

Matric | Matriculated in 2014
